SUMMARY

Software Development Engineer with 1+ year at Tata Consultancy Services building enterprise-grade Java, Spring Boot, and Angular applications for 1,000+ concurrent users. Reduced a critical certificate-generation workflow from 45 minutes to under 3 minutes (93% faster) using parallel processing on AWS. Competitive programming finalist: Global Rank 141 out of 315,000 candidates at TechGig Code Gladiators 2023. Proficient in Java, Python, Spring Boot, Angular, AWS, Jenkins, REST APIs, and SQL.

TECHNICAL SKILLS

Languages: Java, C++, C, Python, JavaScript

Frameworks: Spring Boot, Angular, Django, Flask, Node.js

Cloud and DevOps: AWS (EC2, S3), Jenkins CI/CD, Git, Linux, REST APIs, Postman, Docker

Databases: SQL, MySQL, JDBC

Core Skills: Data Structures and Algorithms, OOP, System Design, Cryptography, Digital Signing, Microservices

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) - Systems Engineer

July 2024 - Present, Gujarat, India

- **Reduced certificate-generation runtime by 93%** by re-architecting a sequential process into a Java-based parallel pipeline using Spring Boot and AWS, bringing execution time from 45 minutes to under 3 minutes for 1,000+ concurrent users.
- **Architected a digital artifact-signing platform** using Java, Spring Boot, cosign, and SHA-256 custom encryption for binary-file verification, cutting inter-team artifact sharing overhead by 60% across 5+ internal TCS teams.
- **Automated zero-downtime deployments** by owning Jenkins CI/CD pipelines for Java, Spring Boot, and Angular services hosted on AWS EC2, streamlining build, test, and release stages across all production environments.
- **Accelerated delivery of 4+ microservices** per sprint in a cross-functional agile squad using Java, Spring Boot, JDBC, and MySQL, consistently meeting security compliance standards and performance SLAs across every release cycle.

PROJECTS

RoutelQ - AI-Powered Logistics Itinerary Planner

Python, LangChain, OpenAI GPT-4, Scikit-learn, Streamlit

- **Designed a LangChain and OpenAI GPT-4 logistics agent** that processes delivery constraints and generates optimized itineraries with stop sequencing, risk flags, fuel cost estimates, and on-time probability scores, reducing manual planning time by 80%.
- **Engineered TF-IDF, KMeans, and PCA clustering** in Scikit-learn for stop grouping and a Nearest-Neighbour TSP optimizer using Haversine distance in Python, cutting total route distance by up to 25% compared to unoptimized ordering.

Real-Time Chat Web Application

Python, Django Channels, WebSockets, HTML5, Tailwind CSS

- **Launched a sub-50ms latency chat platform** using Django Channels, WebSocket protocol, and Python, supporting 10+ concurrent users across independent chatrooms with zero message loss recorded during load testing.
- **Hardened application security** using Django session-based authentication and CSRF token validation, blocking 100% of simulated cross-site request forgery attacks in QA testing.

ACHIEVEMENTS

- **TechGig Code Gladiators 2023** - Finalist, Global Rank 141 out of 315,000+ candidates, top 0.05% across India.
- **Google Kickstart Round-E 2022** - Global Rank 4,640 out of 20,000+ participants worldwide.
- **LeetCode** - Top 20% globally, peak contest rating 1,650+; active on Codeforces and GeeksForGeeks with 500+ problems solved.

EDUCATION

Dharmsinh Desai University

May 2024, Nadiad, Gujarat

B.Tech. in Electronics and Communication Engineering, GPA: 8.94 / 10.0

Kendriya Vidyalaya A.F.S., Vadodara

93.8% (XII), 92.2% (X), May 2020

Class XII: Maths, Physics, Chemistry, Computer Science - Class X

LEADERSHIP

- **Mobile Development Lead, GDSC-DDU** - Spearheaded Android and cross-platform development workshops, upskilling 50+ peers across 3 sessions.
- **Core Organiser, DU-Hacks 2.0 Hackathon** - Directed end-to-end logistics, participant coordination, and technical judging for a 200+ participant event.
